

9–10 September

EXHIBITION-FORUM ON AUTONOMOUS SOLUTIONS
FOR BUSINESS, PRIVATE HOUSEHOLDS AND CRISIS
MANAGEMENT IN CITIES

AUTONOMY:EXPO

BUSINESS • HOME • COMMUNITY

ENERGETICS

Autonomous & Flexible Power Systems

WATER AND SANITATION

Water & Sanitation Systems

HEATING

Heating Systems

INNOVATION AND RAPID CONSTRUCTION

Recovery & Rapid Construction

BUSINESS

Keeping things moving

Business and industry — comprehensive solutions to ensure operational continuity, energy resilience and minimise downtime

PRIVATE HOUSEHOLDS

To be self-sufficient

Private households — autonomous life support systems designed to ensure energy independence, comfort and safety in all conditions

COMMUNITIES

To function in crisis

Communities — rapid decisions to deal with emergencies, manage incidents and ensure essential life-support systems

RAPID CONSTRUCTION AND RECONSTRUCTION

For rapid deployment

Reconstruction and rapid construction — infrastructure solutions for the immediate deployment of facilities, ensuring the continuity of all processes — from rapid deployment to full-scale permanent operation

ENERGETICS

Autonomous & Flexible Power Systems

Immediate solutions:

When you need power right here, right now.

- mobile generators (diesel, petrol, gas)
- mobile power units
- temporary power supply systems for sites
- mobile BESS (battery energy storage systems)
- rapid-deployment charging stations
- field and emergency power modules
- hybrid mobile solutions (generator + storage)
- backup power systems for critical infrastructure

The essence: fast connection, stabilisation, resolution of the crisis

Stationary solutions:

Ensuring energy independence for years to come.

- solar power plants (private, commercial, industrial)
- stationary energy storage systems (BESS)
- inverter systems and power electronics
- microgrids and local energy networks
- hybrid power systems (solar + storage + generation)
- gas piston and cogeneration plants
- small- and medium-scale wind generation
- local energy hubs for communities and businesses
- backup systems as part of permanent infrastructure

The essence: generating, storing and managing energy separately from the grid

HEATING

Heating Systems

Immediate solutions:

Solutions for cases where heating is needed immediately, regardless of the condition of the infrastructure.

- mobile boiler units (gas, diesel, solid fuel)
- mobile heat generators
- temporary heating systems for buildings and structures
- infrared and air heaters
- heat cannons (diesel, electric, gas)
- mobile heat supply modules
- emergency heating systems for critical infrastructure
- quick-to-install heat distribution systems

The essence: to provide heat quickly, to stabilise the situation, to prevent losses

Stationary solutions:

Solutions that provide reliable and independent heating systems for years to come.

- heat pumps (air-to-water, water-to-water, ground-to-water)
- autonomous heating systems for residential and commercial buildings
- modular and fixed boiler rooms
- cogeneration and trigeneration units
- heat storage systems
- local heating units and mini-CHP plants
- centralised and decentralised heat supply systems
- integrated solutions (heat + electricity)
- heat automation and control systems

The essence: efficient production, storage and distribution of heat, regardless of external factors

WATER AND SANITATION

Water & Sanitation Systems

Immediate solutions: Solutions for situations where access to water and sanitation needs to be provided immediately.

- mobile water treatment plants
- mobile water supply systems
- field-based drinking water treatment units
- mobile water storage tanks and containers
- emergency water supply systems
- mobile pumping stations
- temporary sanitation modules (showers, toilets)
- solutions for rapid deployment of sanitation facilities
- water disinfection systems

The essence: rapidly provide access to water and basic hygiene, stabilise the situation

Stationary solutions: Solutions that create independent and reliable water supply and sanitation systems.

- local water supply systems (for residential buildings, communities and businesses)
- water drainage
- wells and water intake systems
- fixed pumping stations
- water filtration and comprehensive treatment systems
- stand-alone treatment plants (residential and industrial)
- sewage and drainage systems
- water reuse solutions
- water collection and storage systems
- automated water quality monitoring systems

The essence: to ensure reliable access to clean water and effective water resource management, regardless of centralized systems

RENOVATION AND RAPID CONSTRUCTION

Rapid & Prefab Construction

Immediate solutions: Solutions for rapid response, temporary accommodation and the swift restoration of functionality:

- modular and containerised buildings of rapid deployment,
- mobile residential and administrative units
- temporary settlements: offices and social infrastructure
- prefabricated frame structures
- temporary renovations and reinforcement of existing buildings

The essence: to ensure a rapid response, the deployment of infrastructure and the restoration of facilities' functionality in the shortest possible time

Stationary solutions: Solutions designed for long-term use, scalability and integration into new infrastructure.

- prefabricated houses for permanent residence
- modular residential and commercial complexes
- highly energy-efficient timber-frame houses
- SIP-panel buildings as a fully-fledged alternative to traditional construction
- major refurbishment and thermal modernisation
- scalable neighbourhoods and infrastructure solutions

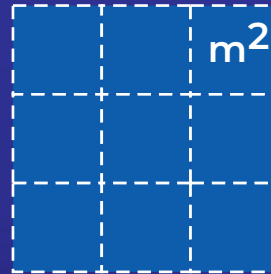

The essence: durability, energy efficiency, independence and scalability

Registration fee: 170 €

**EQUIPPED
EXHIBITION AREA
120 € / m²**

Includes exhibition structures, furniture (depending on the size of the stand), carpet, power supply, lighting, company name displayed on the stand's frieze, night-time exhibition security

**UNEQUIPPED
EXHIBITION AREA
110 € / m²**

Includes night-time exhibition security

Additional equipment and services must be ordered separately.
Prices including VAT.

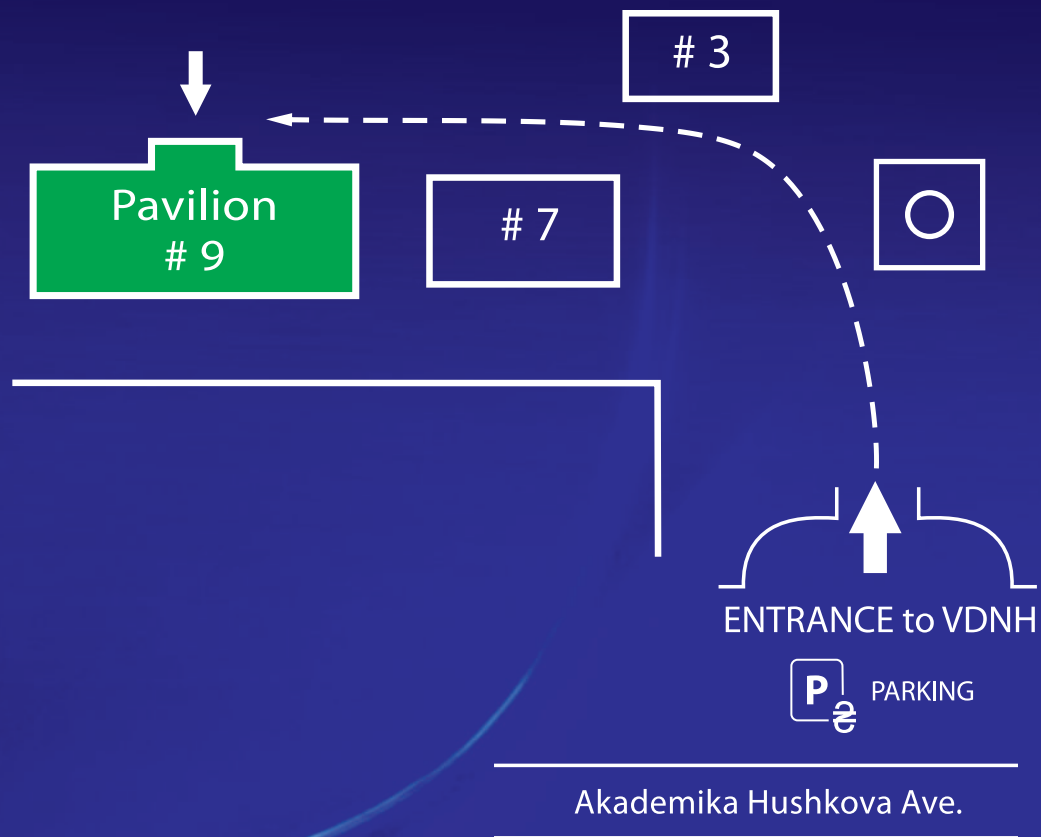

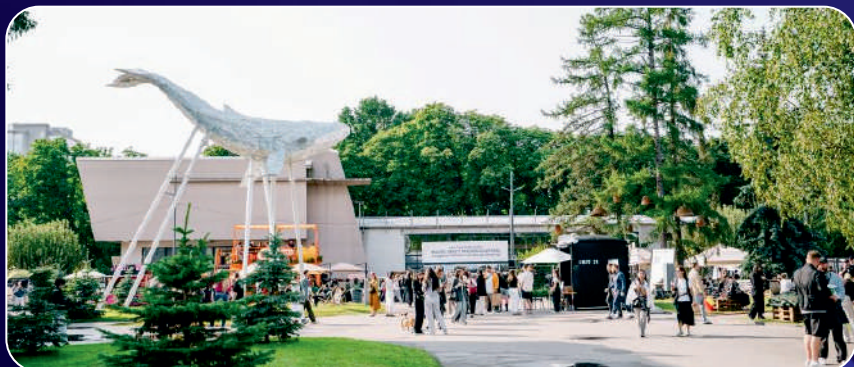

AUTONOMY:EXPO
